

# ecopipette

## Capp ecopipette™ Unique Advantages

- Only half as many turns to set volume as any other pipette.
- Display not obscured by the hand during operation.
- Volume locking device.
- Lowest thumb load of any pipette for aspiration and blow-out.
- Only pipette with easily exchangeable and low cost counter mechanism.

- Fully autoclavable pipette body with no need of disassembly.

- Large and well placed ejector pad for the most comfortable tip ejection.
- Almost negligible tip ejection force - lower than any other pipette.

- O-rings at tip base for best tip attachment.
- Compatible with the largest variety of tips.
- Only pipette with no deformation of tip cone over time.
- Lowest risk of breakage as a result of accidental dropping.

### ecopipette innovation

- Made to last: durable materials ensure a prolonged life time.
- Packaging made from recyclable or biodegradable paper.
- Capp ecotrade scheme: return your old pipettes (any brand accepted) and get a discount on your new ecopipette. Capp will ensure an environmentally safe waste discharge of your old pipettes\*.

\* valid for purchases through distributors which joined the ecotrade Programme.
